

Historic Downtown Restoration

Exeter, New Hampshire

**WOODBURN
& COMPANY**

Landscape Architecture, LLC

Working with Civil Design Engineering Consultants, LLC and Exeter's Historic Downtown Committee, Woodburn and Company developed numerous options for the restoration and improvement of Exeter's streets, sidewalks and landscape. Multiple public presentations and referendum led to a phased plan for the center of town that illustrated minimal change to the existing traffic pattern, additional greenspace at the historic bandstand, brick paved sidewalks, historic lighting, new street trees and a clear separation between pedestrian and automobile spaces.
