

Raleigh Way Portsmouth, New Hampshire

Working with CLD Engineering, Inc., Woodburn and Company provided landscape architecture design services for street improvements to a residential street in the Historic Atlantic Heights Neighborhood of Portsmouth, New Hampshire. Designed and built before the advent of automobiles, the neighborhood has a historic scale and charm that required finesse and sensitivity from its designers. Project goals were to provide adequate parking, upgrade utilities, create pedestrian friendly walkways, and restore a healthy, sustainable, environmentally appropriate canopy of green over the street. Public participation was key to the success of this project which also studied the pros and cons of one way versus two way traffic and their impact on the surrounding neighborhood.
